

The Federal Communications Commission

Dear The Federal Communications Commission,

Don't I already pay enough of my share in taxes? I pay taxes to get my check, I pay taxes in order to spend my already taxed money, and I also pay taxes to live where I'm being taxed twice already. Another tax-hike hike will greatly harm individuals like myself that has a family of 4 with only one income. Please reject this, as others like myself (an average American), are forced to pay more while corporate America gets richer off us.

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Leonard Fox
